Abstract

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

Abstract (german)

Dies hier ist ein Blindtext zum Testen von Textausgaben. Wer diesen Text liest, ist selbst schuld. Der Text gibt lediglich den Grauwert der Schrift an. Ist das wirklich so? Ist es gleichgültig, ob ich schreibe: „Dies ist ein Blindtext“ oder „Huardest gefburn“? Kjift – mitnichten! Ein Blindtext bietet mir wichtige Informationen. An ihm messe ich die Lesbarkeit einer Schrift, ihre Anmutung, wie harmonisch die Figuren zueinander stehen und prüfe, wie breit oder schmal sie läuft. Ein Blindtext sollte möglichst viele verschiedene Buchstaben enthalten und in der Originalsprache gesetzt sein. Er muss keinen Sinn ergeben, sollte aber lesbar sein. Fremdsprachige Texte wie „Lorem ipsum“ dienen nicht dem eigentlichen Zweck, da sie eine falsche Anmutung vermitteln.

[WEB:GNU:GPL:2010, WEB:Miede:2011] And after the second paragraph follows the third paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

Methodology

After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special

content, but the length of words should match the language. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

Strategy 1 Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

```
1 #!/usr/bin/env python
2 print("Hello World")
```

Lst. 1.1: This simple helloworld.py file prints Hello World.

In ?? some code is shown.

Strategy 2 This is the second paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

```
1 #!/usr/bin/env python
2 def bubble_sort(list):
3     for num in range(len(list)-1, 0, -1):
4         for i in range(num):
5             if list[i] > list[i+1]:
6                 tmp = list[i]
7                 list[i] = list[i+1]
8                 list[i+1] = tmp
9
10 alist = [34,67,2,4,65,16,17,95,20,31]
11 bubble_sort(list)
```

12 `print(list)`

Lst. 1.2: This is a bubble sort function.

In ?? some code is shown.

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

Example Appendix

After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

A.1 Appendix Section 1

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

Tab. A.1: This is a caption text.

Alpha	Beta	Gamma
0	1	2
3	4	5

A.2 Appendix Section 2

This is the second paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about

the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

Tab. A.2: This is a caption text.

Alpha	Beta	Gamma
0	1	2
3	4	5

And after the second paragraph follows the third paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language. Eigenständigkeitserklärung

Hiermit erkläre ich, dass ich die vorliegende Arbeit selbstständig verfasst und keine anderen als die angegebenen Quellen und Hilfsmittel benutzt habe (dazu zählen auch „KI-Werkzeuge“). Sämtliche wörtlichen und sinngemäßen Übernahmen und Zitate sind kenntlich gemacht und nachgewiesen. Auch beim Einsatz von KI-Werkzeugen¹ stellt die Arbeit klar dar, in welchem Umfang diese genutzt wurden und welche Inhalte dadurch erzeugt oder beeinflusst wurden². Ich versichere, dass ich keine Hilfsmittel verwendet habe, deren Nutzung die Prüferinnen und Prüfer explizit ausgeschlossen haben.

Mit Abgabe der vorliegenden Leistung übernehme ich die Verantwortung für das eingereichte Gesamtprodukt. Ich verantworte damit auch alle KI-generierten Inhalte, die ich in meine Arbeit übernommen habe. Die Richtigkeit übernommener (KI-generierter) Aussagen und Inhalte habe ich nach bestem Wissen und Gewissen geprüft.

Ich habe die Arbeit nicht zum Erwerb eines anderen Leistungsnachweises in gleicher oder ähnlicher Form eingereicht. Von der Ordnung zur Sicherung guter wissenschaftlicher Praxis und zum Umgang mit wissenschaftlichem Fehlverhalten habe ich Kenntnis genommen.

Mir ist bekannt, dass ein Verstoß gegen die genannten Punkte prüfungsrechtliche Konsequenzen hat und insbesondere dazu führen kann, dass die Studien- und Prüfungsleistung als mit „nicht bestanden“ bewertet wird. Die Einschreibung kann für bis zu zwei Jahre widerrufen werden, wenn Studierende zweimal oder häufiger bei Prüfungsleistungen täuschen (§ 69 Abs. 4 und 5 HochSchG).

Mainz, March 25, 2026

Aaron Habyarimana

¹Mit „KI-Werkzeugen“ werden computergestützte Systeme bezeichnet, die auf Basis maschinellen Lernens neue Inhalte generieren können (z. B. ChatGPT, Gemini, Claude, LLaMA, Midjourney, Stable Diffusion o. ä.).

²Die Nutzung von KI-Werkzeugen muss dann kenntlich gemacht werden, wenn Sie den Kern der Aufgabenstellung in von den Prüfern nicht anzunehmender Weise berührt: Sollte nichts anderes explizit mit den Prüferinnen und Prüfern vereinbart worden sein, so ist dies der Fall, sobald wesentliche Teile der eingereichten Arbeit (z. B. ganze Sätze des Textes, ganze Abbildungen, nicht-offensichtliche Teile von Rechnungen oder Beweisen, mehrere Zeilen von Programmcode am Stück) von solchen Werkzeugen generiert wurden und wörtlich oder in abgewandelter Form in die Arbeit übernommen wurden oder wesentliche Konzepte oder Ideen (z. B. eine Gliederung der Literatur oder ein Lösungsansatz für ein Problem) von KI-Werkzeugen generiert wurden.

Hinweis: Es wird im Falle von abweichenden Vereinbarungen mit den Prüferinnen und Prüfern empfohlen, jene im Vorfeld schriftlich festzuhalten und zusätzlich auch noch einmal in der eingereichten Arbeit zu benennen.
